

WE ARE THE FUTURE

At our company, innovation and quality are at the heart of everything we do. We are committed to providing products and solutions that will shape the future of the construction and technology industries. Join us as we lead the way into a brighter and more efficient tomorrow.

ALL TYPES OF HYDRAULIC PUMPS, CABLES, MOTORS AND VALVES

Hydraulic Pump and Power Systems Division provides a broad selection of piston pumps, hydraulic motors and power units that help our customers meet their industrial and mobile application needs.

**"Powering Precision and Performance:
Unleashing the Potential
of Hydraulic Innovation."**

BENT AXIS PUMPS

Hydraulic truck pump series has operating pressures up to 400 bar (5,800 psi) and speeds up to 3050 rpm. The F1 pump has a robust design that provides circuit reliability for the most demanding truck applications sizes from 12 - 101 cc.

VARIABLE PISTON PUMPS

Variable, swashplate piston pumps designed for operation in open circuit, mobile hydraulic systems. Perfect choice when it comes to cost-saving installation as well as high productivity and power density. Displacements from 60 to 145 cc/rev.

BENT AXIS MOTORS

Hydraulic motor series has an operating pressures up to 480 bar (7,000 psi) and speeds up to 6,500 rpm. It is designed for both open and closed circuit transmissions with focus on high performance machines. Sizes from 110 - 160 cc.

INVERTERS, WELDING MACHINES AND ACCESSORIES

DC INVERTER MIG WELDER

Dual Pulse function

Allows to activate devoted pulse curves for alluminum, mild steel, stainless steel and CuSi3

Arc Stability

Waveform control, for added stability of the arc, even at low currents.

Digital display

Variable amperage control with digital meter, for a simultaneous welding current and tension display.

Protections

Equipped with temperature, voltage and current sensors for high protection.

Accessories

Optional trolley and water cooling unit.

DC INVERTER MMA WELDER

Tigmode

Capable of welding with lift tig mode

Extra functions

' Hot Start', Anti- sticking and ' Arc Force ' built in

Protections

Equipped with the temperature voltage and current sensors for high protection

Digital display

Variable emperorge control with digital meter for simultaneous building current display

Weight

Extremely low weight and versatility

Generator friendly

Designer to work with diesel generators and to avoid failures due to its voltage spikes

DC INVERTER HF TIG WELDER

Multiple Mode

MMA/LIFT TIG/HF TIG.

Up/Down Slope

Selectable Up/Down Slope Time.

Pre/Post Flow

Selectable Pre/Post Flow Time.

Pulse

High performance on ultra thin surfaces with no deformation

Protections

Equipped with temperature, voltage and current sensors for high protection.

Generator friendly

Designed to work with diesel generators and to avoid failures due to its voltage spikes.

DC INVERTER MIG WELDER

Multipurpose

MIG, TIG and MMA Modes selectable.

Arc Stability

Waveform control, for added stability of the arc, even at low currents.

Digital display

Variable amperage control with digital meter, for a simultaneous welding current and tension display.

Protections

Equipped with temperature, voltage and current sensors for high protection.

Accessories

Optional trolley and water cooling unit.

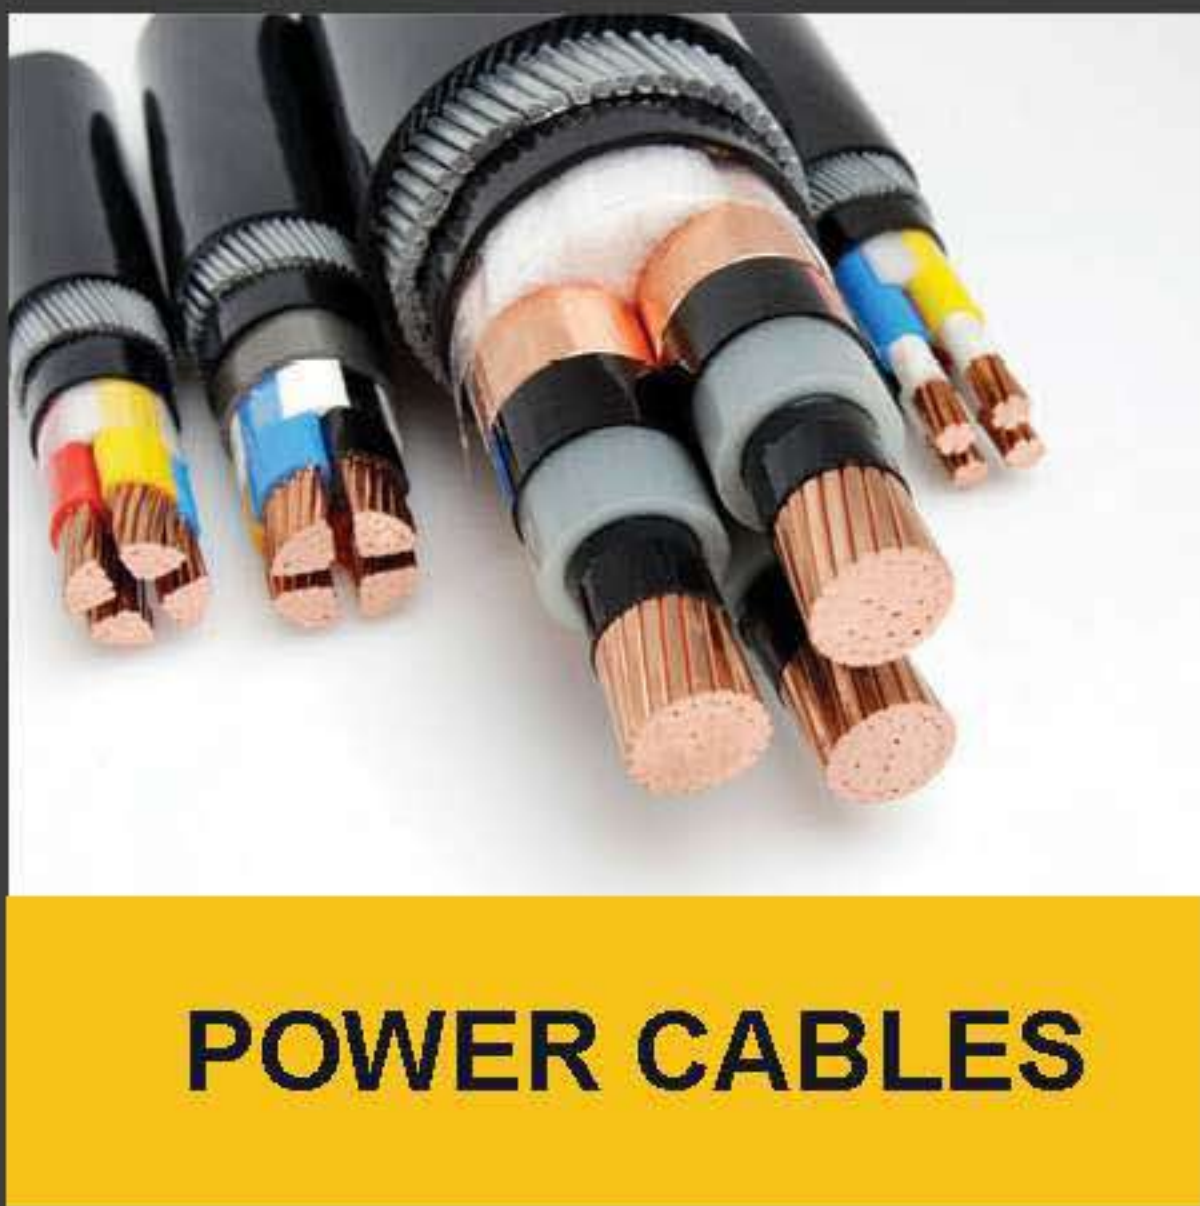

ALL TYPES OF CABLES

(Ducab, Oman cables, etc)

"Reliable,
Durable and Efficient
solutions for all your needs."

ALL TYPES OF MECHANICAL PRODUCTS

MOTOR

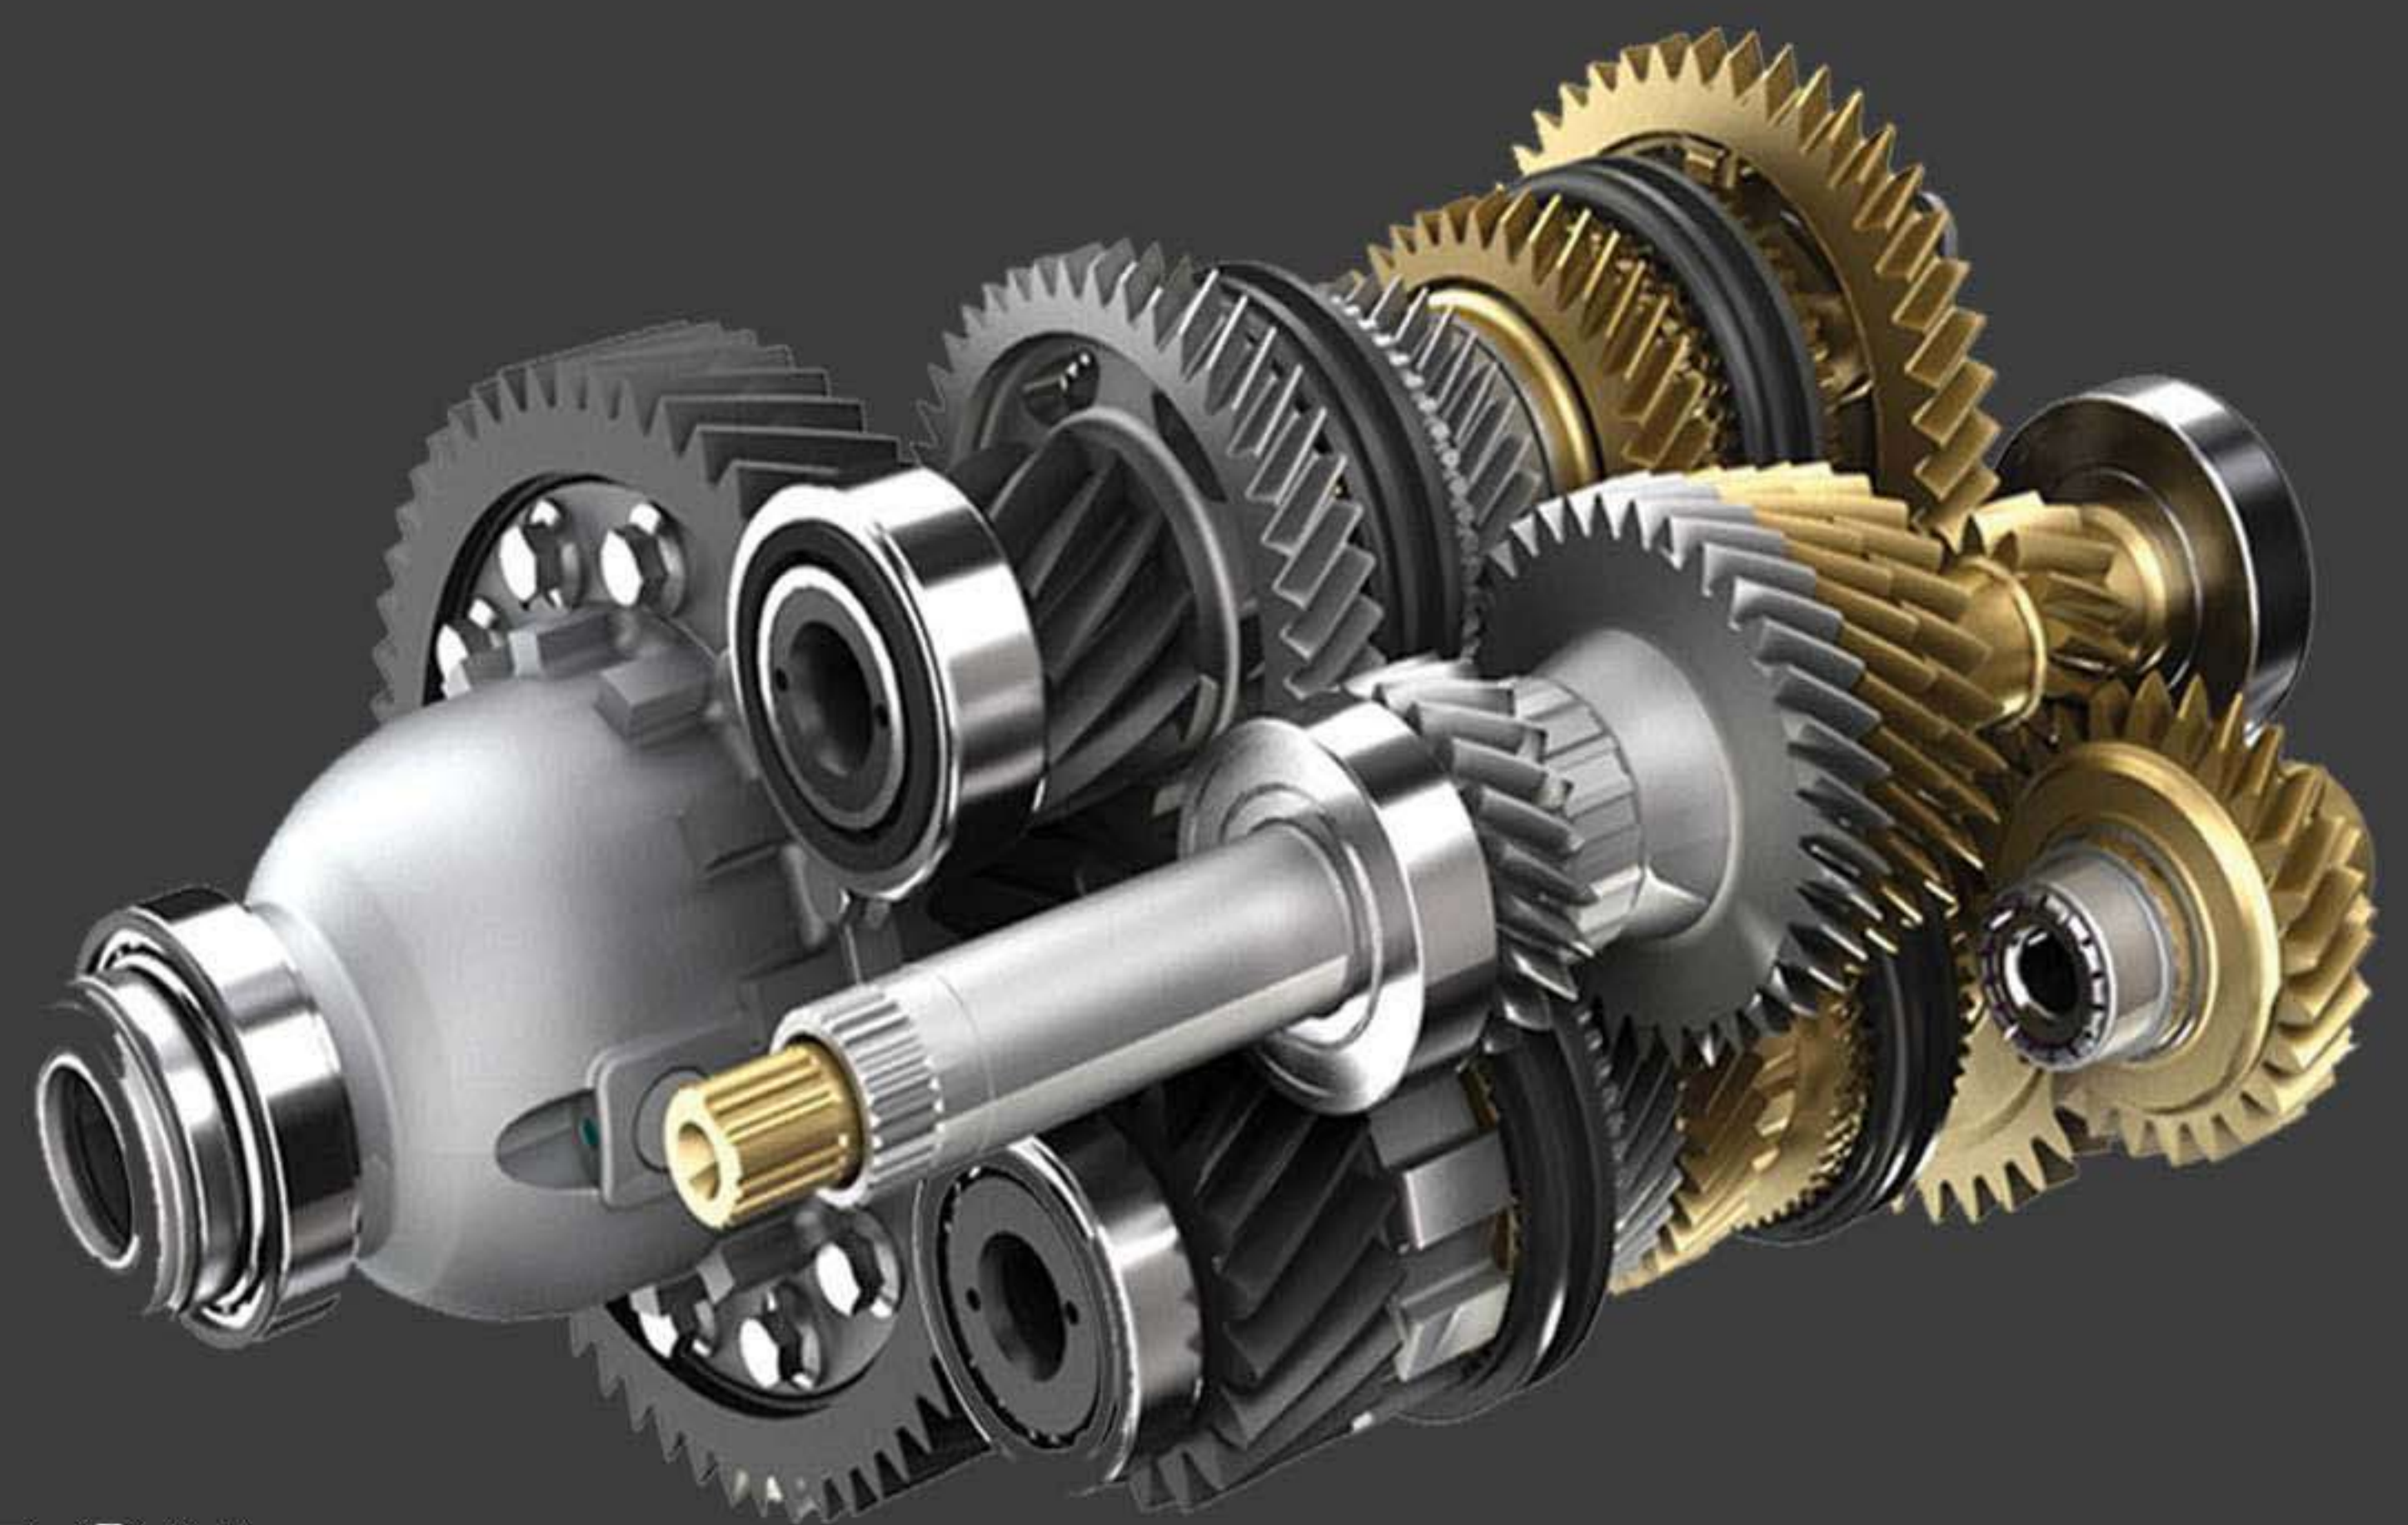

Our motors are robust, efficient and durable. They are built to cope with the toughest conditions, and reliably ensure the durable availability of your industrial facilities.

These motors are designed and produced according to IEC international standard. They are made of high quality cast iron or steel plate with good appearance and performance.

PUMPS

Empower your machinery with our state-of-the-art mechanical pumps. Designed for precision, reliability, and peak performance, they ensure your operations run smoothly and efficiently. Trust in our technology to drive your success forward.

GEARBOX

Gearboxes simply refer to a set of gears and their casing, most commonly found in automobiles. Gearboxes are used to transfer energy from one rotating power source to another and can be found in automobiles, turbines, and heavy machinery.

LOAD CELLS

Load cells are sensors that detect force (mass, torque, etc.). When force is applied to a load cell, it converts the force into an electrical signal. Load cells are also known as "load transducers," because they convert a load (force) into electrical signals.

MECHANICAL GAUGES

Mechanical gauges are tools which are used for measuring dimensions, pressure levels. These devices come in two variants: mechanical and electromechanical. Pressure measuring gauges can be either analogue or digital subject to readouts.

VALVES

Valves are considered more durable than biologic valves, usually lasting throughout a patient's life span. However, mechanical valves carry a high risk of thromboembolism and require lifelong anticoagulation therapy.

HOME AUTOMATION SYSTEM

"Transform your living space with our cutting-edge home automation products. Experience unparalleled convenience, security and energy efficiency at your fingertips. Elevate your home to smart living today."

MULTI-FUNCTIONAL INTELLIGENT KEYPADS

VIDEO SECURITY SYTEMS

SECURITY & SURVELLIANCE SYSTEMS

“We Reach
you,
wherever
you are.”

INTELLIGENT BMS SOLUTIONS

ALL TYPES OF EARTHING MATERIALS

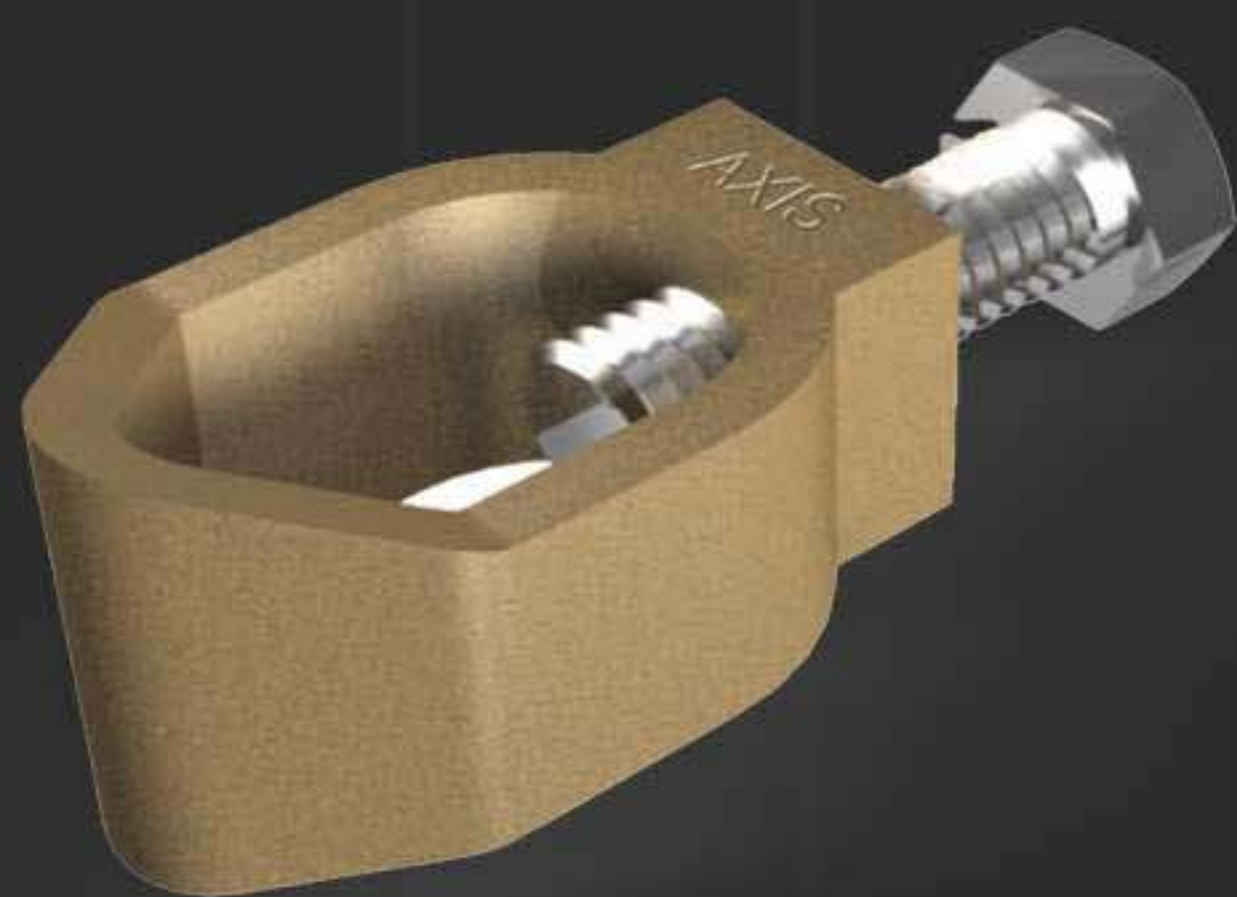

Explore our comprehensive range of earthing material, such as Earth Rods, Earth Rod Connectors, Crimp C Connectors, Copper Plate Earthing, Earth Rod Clamps, Copper Clad Steel Connectors and many more. These UL Listed components ensure the smooth functioning of your electrical systems by creating a secure connection to the earth, safeguarding both your personnel and equipment from electrical faults.

Earth Pits

Create secure and dependable connections effortlessly with our sturdy copper Earth Rod Clamps. Available in various sizes, these clamps guarantee a steadfast connection between the earthing strip and your electrical equipment.

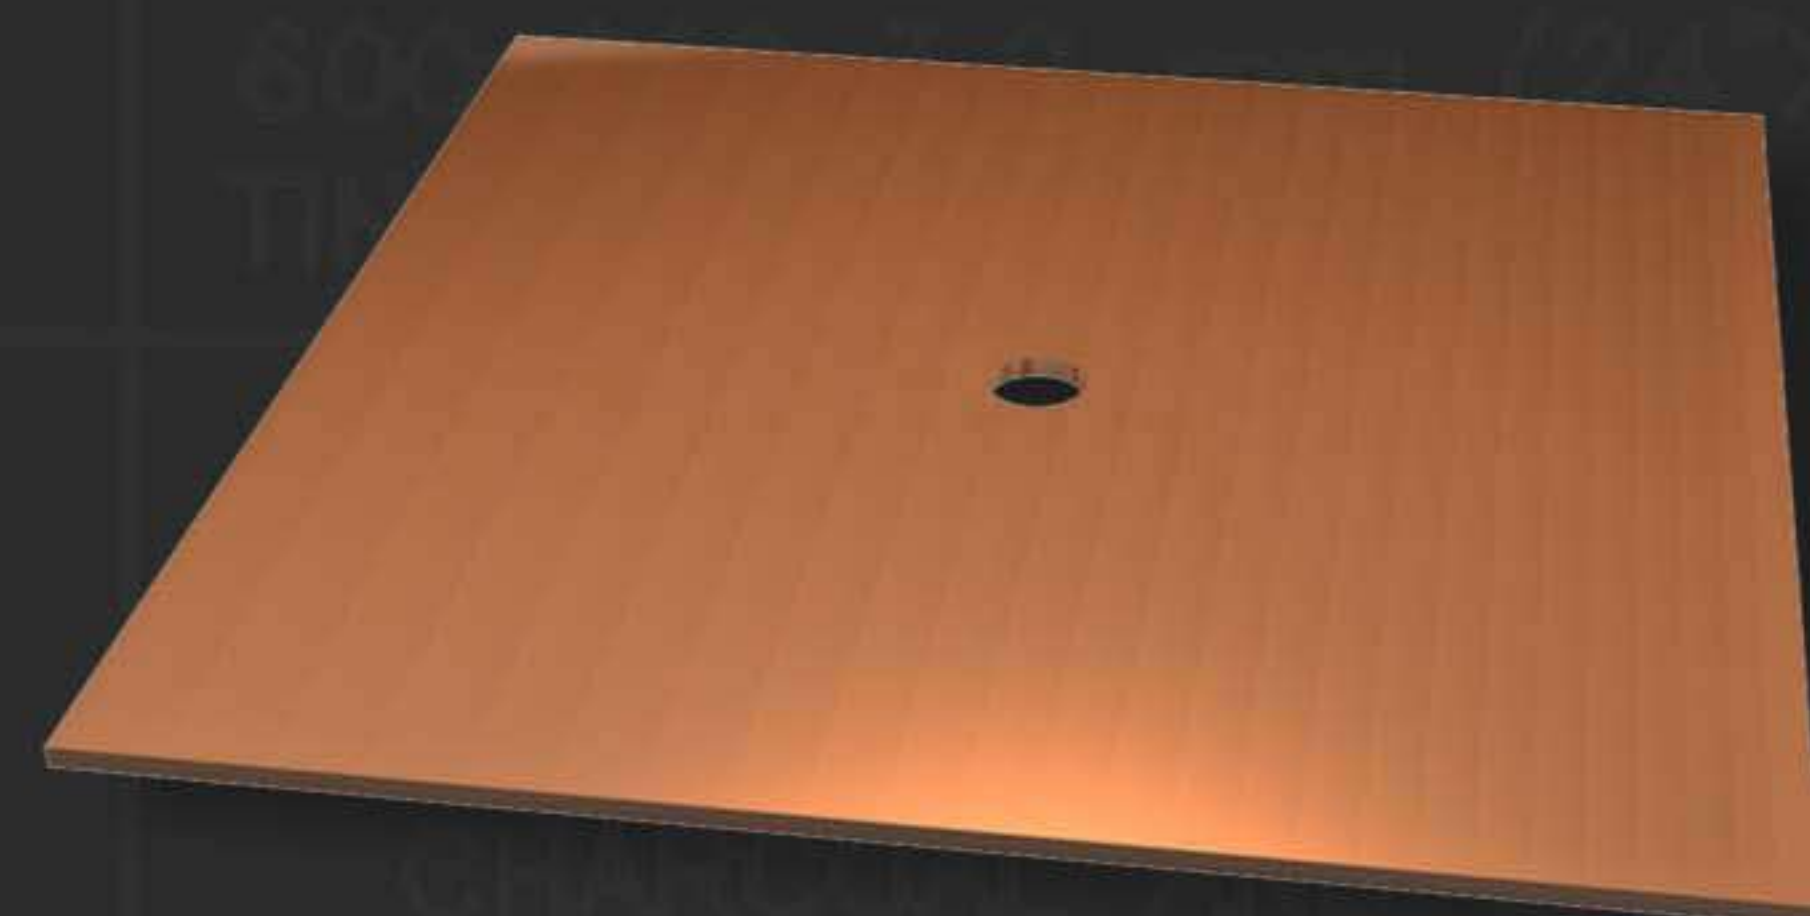

Earthing Clamps

Ensure easy access and proper maintenance of your earth electrodes and other components of the earthing system. Earth Pits are typically made of reinforced concrete and high-quality plastic

Earth Rods

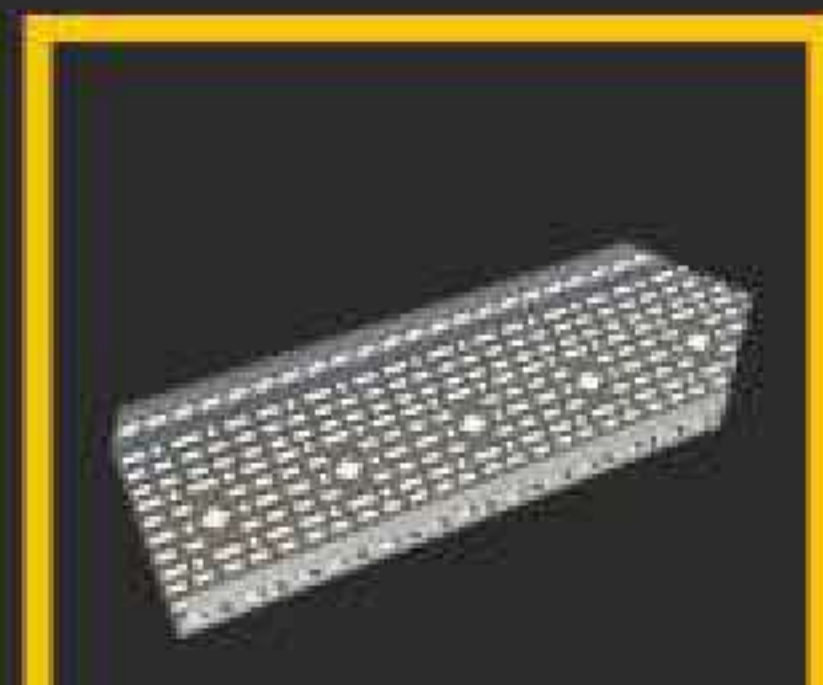

Experience exceptional earthing with our corrosion-resistant copper-bonded steel Earth Rods. Available in various lengths to suit your installation needs, these rods provide a stable and reliable earthing system for your electrical setup.

Earth Plate

Experience exceptional earthing with our corrosion-resistant copper-bonded steel Earth Rods. Available in various lengths to suit your installation needs, these rods provide a stable and reliable earthing system for your electrical setup.
